

Translate the linear equation to each linear form.

	Slope-Intercept Form	Point-Slope Form	Standard Form
1		$y - 2 = 2(x - 3)$	
2	$y = -\frac{2}{3}x + \frac{5}{3}$		
3	$y = 7x + 16$		
4			$3x + 2y = -16$
5		$y - 3 = -\frac{3}{2}(x - 3)$	
6			$3x - 8y = 4$
7		$y - 5 = 3(x + 2)$	
8	$y = x + 1$		
9			$-2x + 9y = -9$
10	$y = 5x + 3$
